QUALIFICATION

Masters in Computer Science, Bangor University, UK – 2019

Bachelor of Engineering in Computer Science, JNTU, Hyderabad – 2016

PROJECTS

Integration of Sound Signature Using Graphical Password Authentication System.

Here a graphical password system with a supportive sound signature to increase the security of the password. In proposed work a click based graphical password scheme called Cued Click Points (CCP) is presented.

Privacy Preserving Multi Key Word Ranked Search Using Encrypted Cloud Data.

Considering the large number of data users and documents in cloud, it is crucial for the search service to allow multi-key word query and provide result similarity ranking to meet the effective data retrieval need.

TECHNICAL SKILLS

Network Security Tools: Nessus, Nmap, Kibana, cuckoo, skipfish, ELK-Stack, wfuzz, Android-Studio, Wpscan, MobSF, Nexpose, Metasploit, Wireshark.
Proxies/Sniffers Tools: Burp Suite, Web scarab, Wireshark, DirBuster.

Operating Systems: Linux (Kali, Mint, Arch, Ubuntu, etc), Windows (All Latest windows), Servers (Windows 2012 r2, 2016, 2019)

Languages: Python, Java Script, C , C++, Ruby (Learning)

OTHERS

- *Perform OWASP Top 10 vulnerability scans.
- *Manage periodic VA/PT on key applications.
- *Managing end point security on firewalls.
- *Ability to analyze false positive issues.
- *Provide assistance to system users relative to information systems security matters.
- *Passionate for learning information security and acquiring new skills.
- *Engage with community in learning new skills.
- *Strong time management and organizational skills.
- *Strong organizational skills and ability to multi-task.
- *Continuous updates on latest CVE'S and EXPLOITS.
- *Giving seminars on Cybersecurity and educating people about it.

HIGHLIGHTS OF 2020

- * **Been in the “HALL OF FAME” on “HACK THE BOX”**
- * **Ranked “GURU” in HACK THE BOX.**
- * **Machine contributor for “Vulnhub”.**
